ICYMI, on [White House Chronicle](#):

Business leaders discuss conservative carbon tax policy on White House Chronicle

“Republicans need an answer, and this is a conservative, pro-market, pro-growth alternative to the kind of a top-down regulatory system that John was talking about, of subsidization and regulation. Because our plan would actually be pro-GDP growth. If you can eliminate the regulations, put in a fee on carbon, do it the way we would suggest...it is actually pro-GDP growth so it creates jobs as well as, most importantly, helps to clean up the environment.”

– *William Strong, Chairman and Managing Director of Longford Capital Management, AMS Board of Directors*

“Bill and I believe, our colleagues, the founders of the organization, believe that carbon dioxide is a pollution problem, but it is so multi-point, so widespread that it’s very hard to get at in any way other than pricing it into the marketplace...And we think trading very expensive micro-regulations, indeed trading mandates for renewable purchases, for a pervasive carbon tax would be cheaper, more market-friendly, and more effective than the current package of solutions.”

– *John W. Rowe, Chairman Emeritus of Exelon Corporation, AMS Board of Advisors*

The Alliance for Market Solutions (AMS) aims to create a conversation among conservatives on the benefits of market-oriented solutions to one of America’s pressing economic challenges: advancing clean energy and reducing carbon pollution. AMS believes in the need for pro-growth solutions for our economy, replacing harmful government regulations, and responding to changing public attitudes and demographics.

###

[Alliance for Market Solutions](#) (AMS) is an organization of conservative leaders with experience in business, government, and the intellectual community who know that markets and economic incentives are the most powerful drivers of change and are more efficient and effective than top-down regulation. We aim to educate conservative policymakers on the benefits of market-oriented solutions to one of America’s most pressing economic challenges: advancing clean energy and reducing carbon pollution.

The carbon tax policy we support is consistent with a pro-growth conservative agenda. It would replace costly regulations and prevent new regulations from burdening families and job creators. And it would eliminate economically harmful taxes on investment and family incomes. AMS is a 501(c)(3) non-profit educational organization. We don't engage in electoral politics on behalf of any candidate, campaign or party. We are recruiting allies and developing policy analyses to help conservative policymakers consider a pro-growth, conservative carbon tax policy.
