Replacing harmful regulations with a revenue-neutral carbon tax will spur economic growth

Washington, D.C. – The Alliance for Market Solutions (AMS) today issued the following statement in advance of President Trump’s State of the Union address.

“Repealing outdated and ineffective regulations makes sense,” said Alex Flint, Executive Director of AMS. “President Trump has already made progress on cutting back regulations that stifle economic growth. We need a better method of addressing carbon pollution, and replacing these harmful regulations with a pro-growth, revenue-neutral carbon tax would support clean energy while spurring innovation and investment. A carbon tax would also generate over \$1 trillion in additional revenue over the next decade, which lawmakers could use to make the 2017 tax reform permanent or further reduce tax rates.”

The Alliance for Market Solutions (AMS) aims to create a conversation among conservatives on the benefits of market-oriented solutions to one of America’s pressing economic challenges: advancing clean energy and reducing carbon pollution. AMS believes in the need for pro-growth solutions for our economy, replacing harmful government regulations, and responding to changing public attitudes and demographics.

###

Alliance for Market Solutions (AMS) is an organization of conservative leaders with experience in business, government, and the intellectual community who know that markets and economic incentives are the most powerful drivers of change and are more efficient and effective than top-down regulation. We aim to educate conservative policymakers on the benefits of market-oriented solutions to one of America’s most pressing economic challenges: advancing clean energy and reducing carbon pollution.

The carbon tax policy we support is consistent with a pro-growth conservative agenda. It would replace costly regulations and prevent new regulations from burdening families and job creators. And it would eliminate economically harmful taxes on investment and family incomes. AMS is a 501(c)(3) non-profit educational organization. We don’t engage in electoral politics on behalf of any candidate, campaign or party. We are recruiting allies and developing policy

analyses to help conservative policymakers consider a pro-growth, conservative carbon tax policy.
