AMS applauds introduction of carbon tax legislation

Washington, D.C. – The Alliance for Market Solutions (AMS) issued the following statement in response to the carbon tax legislation introduced today:

“We commend Ambassador Francis Rooney for his continued leadership within the Republican caucus on addressing climate change,” said Alex Flint, executive director of AMS. “His approach is durable and protects American prosperity, increasing paychecks and incentivizing innovation without growing the government. And it is the type of market-based policy that serves as a model for other countries trying to reduce carbon pollution.”

###

[Alliance for Market Solutions](#) (AMS) is an organization of conservative leaders with experience in business, government, and the intellectual community who know that markets and economic incentives are the most powerful drivers of change and are more efficient and effective than top-down regulation. We aim to educate conservative policymakers on the benefits of market-oriented solutions to one of America’s most pressing economic challenges: advancing clean energy and reducing carbon pollution.

The carbon tax policy we support is consistent with a pro-growth conservative agenda. It would replace costly regulations and prevent new regulations from burdening families and job creators. And it would eliminate economically harmful taxes on investment and family incomes.

AMS is a 501(c)(3) non-profit educational organization. We don’t engage in electoral politics on behalf of any candidate, campaign or party. We are recruiting allies and developing policy analyses to help conservative policymakers consider a pro-growth, conservative carbon tax policy.
