### **AMS Response to President Biden’s Climate Change Executive Order Agenda**

Washington, D.C. – Alliance for Market Solutions (AMS) Executive Director Alex Flint issued the following statement in response to President Biden’s climate change executive order agenda:

“Climate policy by executive order has a fatal flaw -- it is temporary. We need durability. We need to think in terms of decades and put in place policies that can be scaled globally,” said Alex Flint. “Our country has been whipsawed by a previous administration that prioritized energy production and a current administration that prioritizes the climate. Almost everyone in this battle is ready for a deal. Set long-term targets, create an efficient set of regulations and taxes, and put the deal into a statute so that it does not change every few years.’

"Economists, environmental advocates, and a growing number of corporations have been calling for a price on carbon. It is a totally different conversation than it was just a few years ago, and there is a real possibility for a deal if policymakers from both parties engage," Flint concluded.

###

*[Alliance for Market Solutions](#) (AMS) is an organization of conservative leaders with experience in business, government, and the intellectual community who know that markets and economic incentives are the most powerful drivers of change and are more efficient and effective than top-down regulation. We aim to educate conservative policymakers on the benefits of market-oriented solutions to one of America’s most pressing economic challenges: advancing clean energy and reducing carbon pollution.*

*The carbon tax policy we support is consistent with a pro-growth conservative agenda. It would replace costly regulations and prevent new regulations from burdening families and job creators. And it would eliminate economically harmful taxes on investment and family incomes.*

*AMS is a 501(c)(3) non-profit educational organization. We don’t engage in electoral politics on behalf of any candidate, campaign or party. We are recruiting allies and developing policy analyses to help conservative policymakers consider a pro-growth, conservative carbon tax policy.*
